

MARCELLUS GOLD PLATFORM HIGH-YIELD MONTHLY RETURNS

Executive Overview

The Marcellus Gold Platform provides heightened security over your invested capital, with your funds secured in physical Gold.

Our Gold Platform is in a privileged position, having assured supply of discounted Gold under contract from our own MCG Principal, with contractual exit through LBMA (London Bullion Market Association) Refineries, guaranteeing secure payment for the Gold we sell at LBMA PM Fixing.

**HAVING GOLD AS A
FUNDAMENTAL IN YOUR
INVESTMENT PORTFOLIO
IS A NON-NEGOTIABLE**

Early Redemption	Possible from month 4

Your **GOLD** Investment earns you up to **10% per Month**

Global Political Disruption, Currency Uncertainty and Economic Instability ... Brings **GOLD** to the Forefront of MCG's Investment Strategy

The current economic climate has led many investors to hunt for new opportunities. In particular, many people are looking for stable investments to help hedge against inflation and mitigate losses from market volatility. While traditional investments like certificates of deposit or high-yield savings accounts can be a smart option, there are alternatives worth exploring, like gold.

It's no secret that MCG's fundamental pillar and cornerstone to its stability and longevity is found in our balanced approach.

This precious metal has captivated humanity for centuries, and gold continues to be a popular investment option for those who are seeking stability and diversification in their portfolio. As a tangible asset with intrinsic value, gold can act as a safe haven during economic uncertainties.

The challenge for most investors is finding a reliable and safe-haven in which to secure returns in gold trading. This primary challenge is brought about by the lack of absolute control and, therefore, security in your money converting to this precious metal, and then exiting without risk, to produce high-yield returns and wealth.

As economics would have it, there is always a balance between risk and return, bringing us back to our core of a Balanced Approach.

We mitigate risk through the Marcellus GOLD Platform providing a secured and absolute supply contract on existing GOLD, which we buy at a discount and sell to accredited buyers through a LBMA(London Bullion Market Association) licensed refinery. This trading cycle closes the loop and ensures absolute returns.

PROCEDURE

A simple PROCEDURE ensures your swift investment into GOLD, viz. :

- You sign a legally binding Contract detailing the terms and conditions of your investment in Gold, wherein your absolute monthly returns are provided.
- After signing the Contract you are required to transfer your investment capital to the MCG Gold Platform account.
- Upon receipt of your investment capital, MCG will allocate your individual account, which provides you with a monthly statement of account on your investment. This process can take between 3-6 weeks.
- Within 2 weeks from receipt of your investment capital and the setting up of your account, MCG engages your insured funds into the MCG Gold buy-sell program.
- Every 4 weeks you are paid your returns on your insured capital, or you may elect to reinvest the returns to provide increased return value ahead. Your monthly returns are paid at the end of each trading month.
- At expiry of the Contract (12 months), you may reinvest for a further 12-month period under a new Contract, or elect to withdraw your investment capital from the program.
